

.net Experts CI/CD na prática

Apresentação

Felipe Chagas

11 anos de experiência

Objetivos da Live

1. Conceitos Básicos de **DevOps**

> 2. Conceitos Básicos de CI/CD

> > 3. Mãos na Massa 😢 💷

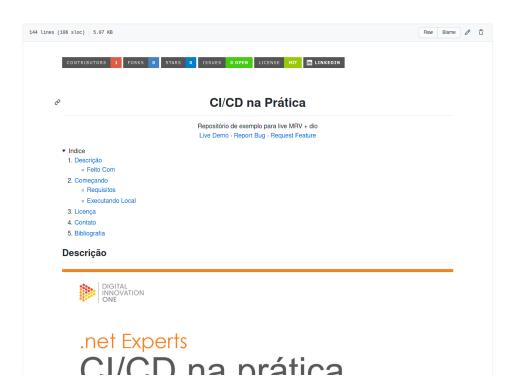

Requisitos Básicos

- ✓ Algoritimos Básicos
- ✓ Azure Cloud Básico
- ✓ Persistência

Parte 1: DevOps CI/CD na prática

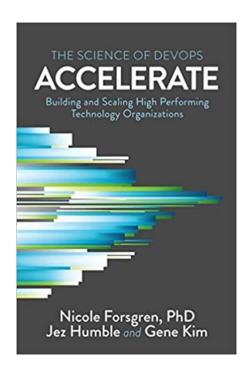

```
mfaultProps = {
                         DIGITAL
                        INNOVATION
serDetailsC
                        shood of timer Details (and);
iserLink = ({
Classimo-(styles-container)
includeAvatar 44 (
 -SiserCetal (sCardDellower
    unive(user)
    TO LINE CARD HOVER DELAYS
                   -(utyles.swsturContainer)
   "Annin' user-Cuser" /"
 Intelligent (classifiance)
  styles.LinkContainer.
  inline 66 styles inlineContainer
timerOptalloCardOuthouse pieco-(user) delago (CARD_HOVER_DELAY)-
    to-{{ nationes: build/mertirt/user) }}
          sor-(classkames(styles.name, (
      [styles.alt]: type --- 'min'.
      [styles.centerName]: [secondaryLink,
      [styles.inlineLink]: inline,
    333
    (children | user.name)
  ( | secondaryLink
    y mult
        ete(secondaryLink.href)
            to-classianes(styles.mane, {
        [styles.alt]: type === 'alt'a
        [styles.secondaryLink]: secondaryLink,
       111
```

O que é DevOps?

```
rendeminatsNovidmin() (
          return (
           -div clas
             ethi classimo-(st
             out classessore(c)
155 W
                {this rendered
                {this.render
                (this, rendere
                (this renders
                (this, renders
                (this, renders)
                (this.renderin
       rendershotsWewIten(title, b)
          return (
           els classiane-(styles, for
               href={trackUrl(url)}
               target*" black"
               retwinospener noceffich
               (title)

100 0
                 typew"logo"
                 classiance(styles, footerSubLoom
             classificare(styles.footerslogen)
       nesser43 4
         return
                           =={styles.footer@lobal}
```

O que é DevOps

Technical Practices

- Continuous Delivery
- Architecture
- Product and Process

Management practices

- Lean Management and Monitoring
- Cultural

Parte 2: Continuous Delivery

CI/CD na prática

Continuous Delivery

- Version Control
- Deployment automation
- Continuous integration (CI)
- Trunk-based development
- Test automation
- Test data management
- Shift left on security (DevSecOps)
- Continuous delivery (CD)

Fácil como um interruptor

Parte 3: Mãos na Massa CI/CD na prática

Dúvidas?

CI/CD na prática
